<http://sci-hub.tw/http://dx.doi.org/10.1...14.59.1.61>

"Hair color was not correlated with attractiveness, but the curvilinear analysis indicated that mediumlength scalp hair was associated with higher attractiveness ratings.2"

"Hair length: 4-point scale; above ears = 1, middle of ears = 2, bottom of

ears to midneck = 3, midneck to shoulder =4"

in the middle of that scale is the most attractive hair length.

long hair clearly not attractive: <https://sci-hub.tw/https://doi.org/10.10...76.9915829>

Can you show an example?

It's fucking over.

it's actually on the scale like 2,5 points, so somewhere between middle of ears and midneck perhaps.

Great find as always

But i also have difficulty imagining what 'most attractive scalp hair length is at the bottom of ears' means

(Also what the attractiveness ratings where for each category)

Help me out with morphs here :)
